Subject: August 5, 2008 KUCC Points of Contact for DOGM.pdf

Attached, please find a scanned electronic copy of the original document, referenced above, that was hand delivered to the Division of Oil, Gas and Mining today, August 5, 2008.

In an attempt to reduce the enormous amounts of paper used in our office each day, the Kennecott Utah Copper Environmental Department has begun to send electronic copies in place of paper copies, to those people copied on pertinent documents, whenever possible. The person or persons to whom the document is addressed will still receive the official hand delivered and date stamped original for the public record, as always.

Besides conservation of paper, this allows for quicker delivery, and gives the recipient the option of printing the document out, saving it, or deleting it after reading, according to each individual's preference.

If you have problems accessing or reading the attachment, please advise me.

Sincerely,

Kris Goss
